

Pediatric Associates of Milwaukee, Notifies Patients of Data Security Incident

Pediatric Associates of Milwaukee, Fond Du Lac Avenue office has recently become aware of a data security incident that resulted in unauthorized access to the private information of our patients. At this time, there is no evidence of any attempted or actual misuse of any personal information. However, we are notifying, via first-class mail, any patient whose information may have been accessed to provide details of the incident and to provide resources to help protect our patients. Pediatric Associates' clinics located at South 27th Street and 635 North 35th Street were not impacted by this incident.

Specifically, on February 17, 2021, Pediatric Associates was the victim of a cybersecurity attack. Pediatric Associates quickly took action against this attack, retaining legal counsel and a leading cyber forensics and incident response team to assess, contain, and remediate any damage caused by the incident. Pediatric Associates then launched a forensic investigation that determined an unknown, unauthorized third party gained access to certain sensitive information, including patient names, date of birth, insurance information, and medical bills. **Importantly, the investigation did not identify specific activity around any individual's information and Pediatric Associates is not aware of anyone experiencing fraud or identity theft as a result of this incident.**

In light of this incident, we are offering complimentary identity theft restoration and credit monitoring services through IDX to help protect any impacted current and/or former patients. We encourage current or past patients of the Fond Du Lac Avenue office who think their information may be at risk to call **(883) 664-1995**.

Pediatric Associates of Milwaukee is committed to ensuring the security of all information within our control, and are taking steps to prevent a similar event from occurring in the future. Once again, we sincerely regret any inconvenience or concern that this matter may cause, and remains dedicated to ensuring the privacy and security of all information in our control.
